OK I just edited <http://www2.epa.gov/region8/gold-king-mine-release-emergency-response> slightly (added a comma) and published it.

I also have access to the shell site <https://wcms.epa.gov/emergencies> -- we should be able to move existing content on <http://www2.epa.gov/region8/gold-king-mine-release-emergency-response> to this site quickly, giving us an entire site for this spill, with plenty of room for lots of data. I just gave Tim access to this site too.

If we make this a microsite with a big banner across it, we'll need some sort of image. If we don't have an image, we can try to reformat this to a resource directory format.

I am off to [Personal Matters/Ex. 6] but can be back in 10-15 minutes to post content. I will keep my phone close by. I can be reached at [Personal Phone/Ex. 6]

Should be back from dinner by 8 pm Mountain Time. Tim and I can work together to determine who will publish content.

Yes. It's a slightly edited sit-rep. I think the question now is whether that page will work as they get sampling data back, information on impacts to the rivers and on drinking water. They expect to have some data back as early as tonight. I haven't heard back from Region 8 on whether they still want help, but will let you know as soon as I do.- George

No word back from Region 8. They are about to have a press call, so they are likely focused on that for the next hour. - George

OPS, Region 8, Region 9, Robert and I had a conference call this evening to discuss communications around the Colorado mine spill. Part of the discussion was about the use of the OSC.org site to give information to the public and press, which Region 8 has been doing. To get away from using OSC.org, Region 8 is now going to try to create a web page on their website. Paula Smith expressed concern about their ability to get the webpage up over the weekend. Is their any assistance we can offer if they need it this weekend? - George
